

## Sample Letter Templates for David Rabbitt for Supervisor:

1. Getting to and from home to work, school, church, shopping, etc. is a universal task for everyone who lives in Sonoma County. Whether you are driving to buy goods, or simply having items delivered to your home, you are impacted by the roads and your cost of goods are impacted by our roads. Since David has been in office, the dollar amount of money spent on our roads to make them smoother, safer, and therefore make our goods less expensive, has been increased 10-fold. I also understand that if the roads were not sealed off from water damage, the cost to repair them would be many times more expensive than repairing them now. The reason we got into trouble with not taking care of our roads was because we had folks in charge that did not understand fixing roads later is way more expensive than keeping them from failing in the first place. David gets it. Why vote for someone who has no experience and wants to learn on the job at your tax expense? Not me. I want the guy who knows the problems and can fix them. David has consistently voted to take care of our roads and that helps keep my costs down. Thank you David! I will be voting for you to continue your good work helping your constituents save dollars!
2. Rabbitt has been one of the better Supervisors to watch our dollars and how they are spent. When the proposal came about to buy the Sears site and build a building on land the County would have to buy, rather than build it on their 80 acre site they already own, it was (at first) only Rabbitt that said "hey slow down and look at the numbers". Rabbitt's opponent Blake Hooper and many others wanted the County to spend well over \$20 million to buy the old Sears site downtown and then be committed to a far more costly construction project than if they simply build on their already owned 80-acre site at the County Center. David watched out for us, read the reports and the spreadsheets, and said the County should not be spending our tax dollars so foolishly. Don't you wish we had more government officials watching out for our tax dollars? As we move towards replacing aging buildings at the County site, I want someone who is watching the costs and not spending my taxes as he learns how to be a Supervisor. I want the guy who has shown he is watching my tax dollars. I am voting Rabbitt and if you like a sharp eye on your tax dollars, you should too!
3. Rabbitt has worked hard to reform our county pension obligation over the past decade. While much of what the Supervisors can do is restricted, David did all he could to reform our public employee pension program to lessen the County liability and improve the County economic standing. As I look at who is endorsing his competition, I do not believe lowering public employee pension obligations would continue should Hooper get elected. I am all for making sure the County workers get what is fair and equitable, but I do not want the fox guarding the hen house. Dealing with pension obligations is complicated, and I sure do not want to hire someone who has zero experience to deal with and negotiate with such an important issue. David has "been there and done that" and I am voting for Rabbitt to continue his good work on lowering public employee pension costs for all of us taxpayers!
4. After the fires hit in 2017, David Rabbitt worked hard to create an emergency system that worked for County residents. Given the experience Rabbitt gained during those horrific fires, I want a steady hand at the County to help make certain we are ready for the next disaster, and we have experienced people to deal with the emergency that may come again. Why take a chance on someone who has zero experience handling an emergency? I refuse to put my family in that kind of danger, so I am voting for Rabbitt for Supervisor and I hope you will to. We do not need an "entry level" Supervisor-we need experience and productivity! Vote for Rabbitt!
