**LIC #132128**

## History of the Northern California Engineering Contractors Association

**T**he Northern California Engineering Contractors Association is a nonprofit organization committed to furthering the interests of the engineering construction industry by providing a platform for political and social advocacy as well as training and education for its member companies.

The Northern California Engineering Contractors Association, normally called the Engineering Contractors Association, or ECA, was formed because of the need for a unified voice to represent the local construction industry.

The ECA, and its Board of Directors, has been the voice of the engineering construction industry for the past thirty-one years. Looking back, it does not seem so long, but looking ahead, there will be many more challenges facing contractors, generating more need of a strong voice for the industry.

The foundation of the ECA has been to address local concerns and issues. It is different from most construction organizations in that it does not deal with union labor issues but incorporates both union and non-union contractors as members.

The purpose and goal of the ECA and its staff is to provide services to the members that help them run their businesses safely, efficiently and in compliance with the many rules, regulations and mandates of government.

The working committees of this Association are the heart and soul of the ECA. Representing the many forms of services are ECA members who volunteer on these committees. These volunteers make the Association beneficial for all the members, while keeping the ECA current with our member and industry needs.

The ECA staff and Safety Committee have worked together to gather information we believe will be valuable to you, our associates, business partners, city officials, and the general public.

In the event of an emergency, we would like you to have information available that will help you in the fastest way possible.

Should you be in need of assistance in the following areas, our members can help you!

*This manual will include in alphabetical order,  
who to contact for:*

- **Counties Serviced**
- **Services**
- **Equipment**
- **Materials**

Obviously, we hope that an emergency situation will not be the reason you need to contact our members, but at least this will help you if the circumstance does arise.

*If you have any questions regarding this manual, or anything else,  
feel free to contact us at:*

## **Northern California Engineering Contractors Association**
