Saturday night, at the Santa Rosa Golf and Country Club, it is going to be a very special night for attendees and honorees. We also welcome and introduce our new Directors and Officers for 2026, and we will get to hear a very rare public speak by outgoing President Dan Giordani of Argonaut Constructors. 2025 was a very good year for the ECA even though it was a relatively "spotty" year for some members due to slow private side projects going to construction, and very competitive bidding in the public works area. Dan is going to give a brief view of the past year, and Kimber (Kadon Trucking) will also give us a brief look forward to her year as ECA President. Only the 3<sup>rd</sup> female president we have had, and I know she is looking forward to a great 2026!

Again, thank you to all of our table purchasers, our sponsors and our other attendees. You are coming out to honor our award winners will help make a very special evening for those being recognized and being present in the big numbers we have coming will mean a lot to our honorees.

Thank you!

John

**The Award Winners to be honored are:**

Contractor of the Year - Western Water Constructors (Josh McGarva)

Affiliate of the Year - Toby's Trucking (Toby Giacomini)

Hermsmeyer Hall Hermsmeyer Hall of Fame Inductee - Louie Gobbi of G & G Heavy Equipment Rentals

Hermsmeyer Hall of Fame Inductee (Posthumous) is Frank Palagi of Ghilotti Brothers, Inc.

Volunteer of the Year - Kristi Pruett

## NEWS YOU CAN USE

1. Construction Materials Prices Rise Sharply Due to Aluminum and Steel Increases: Input prices for new nonresidential construction rose 0.4% in November, not seasonally adjusted, and 3.6% year-over-year (y/y), according to producer price index (PPI) data the Bureau of Labor Statistics (BLS) [posted](#) on Wednesday. The y/y change was the largest since January 2023. In contrast, the PPI for new nonresidential building construction, a measure of what contractors say they would charge to construct a new building, was unchanged for the month and rose only 2.7% y/y. AGC posted tables and a chart of PPI changes relevant to construction. There were notable y/y increases in the PPIs for aluminum mill shapes (28%) and fabricated structural metal bar joists and rebar (17%), a major building material. Although PPIs exclude foreign producers' prices, some domestic producers were quick to raise prices once tariffs took effect. Tariffs on aluminum and steel from most countries increased from 25% to 50% on June 4. Readers are invited to consult AGC's Tariff Resource Center for the latest details and to send information about project timing, materials price changes, and supply chains to [ken.simonson@agc.org](mailto:ken.simonson@agc.org).
2. Nationally: Contractors are anticipating 2025 construction support staff wage increases to average 4.0% by year end, down from the 2024 actual increase of 4.4%," construction pay consultant PAS [reported](#) on January 2, based on a survey of 239 companies in September and October. "Unless construction conditions change, we think 2026 support staff increases will mimic 2025 activity.
3. Faster Approvals, More Risk: NEPA rollback could speed projects but raises legal risks. The Trump administration has rolled back part of the National Environmental Policy Act to expedite federal approval for infrastructure projects involving water and wastewater. The changes impose stricter timelines and page limits for environmental reviews, potentially speeding up permitting. However, legal experts warn that the rollback could increase litigation risks and lead to environmental damage.

4. Data standardization needed for AI to thrive in construction: Data standardization is a significant barrier to the effective use of artificial intelligence in construction, writes Amir Berman of Buildots. Construction data is often siloed and inconsistent, making it difficult to integrate and analyze across projects. Berman calls for "active governance," where leaders treat data as a strategic asset, standardize data collection and reject unstructured data.

## From the Desk of Jim Persons

### **Surveying (Construction) Safety Talk**

Surveying is a relatively repetitive and low-hazard task on its own. However, surveyors on construction sites face many different hazards while completing their work. It is important to evaluate the work environment and eliminate as many hazards as possible prior to beginning surveying activities onsite.
